

## Technical Information fm-foam soft

- **UV-Stable**  
It is lightfast according to outdoor-testing. The LGA examination report is available upon request
- **Waterproof**  
Due to the water tight coating it is water-repellent
- **Resistant**  
It offers high abrasion resistance. Due to lacquer thickness of 1mm it is highly resistant against mechanical load and chemical attack.
- **Fire behavior**  
Fire test: passed  
Smoldering test: passed  
The LGA examination report is available upon request
- **High Class Foam**  
Polyurethane foam, foamed CFC-free, great density of 45kg/m<sup>3</sup>, 6,5 kPa., great shape stability. Due to the extreme flexibility of millions of cells great shape stability also at a constant load is ensured.
- **Environment Protection**  
PU is the material of what foam and lacquer is made of. The water reduce able lacquer is free of heavy metal.
- **Care**  
Please use commercial detergent. Store the *fm-foam soft* furniture dry and roofed during winter time. Every protection against strong weather is extending furniture's lifetime.
