01	<p>A table as if made of one piece - this is how the Doppio table presents itself, where the tabletop and base are made of high-quality, stable and weatherproof ceramic. In addition to the fixed table, Fischer Möbel offers an innovative extension table for indoor and outdoor use. Especially when used outdoors, all parts must be stainless and weather resistant. This places special demands on the materials used as well as the construction. Thus, only weatherproof, high-quality 12 mm ceramic plates are used. All fittings for the Doppio table are exclusively made of stainless steel or aluminum.</p> <p>The Doppio - table offers the advantage that the extensions, which lie under the base plate, can be simply and easily pulled out by means of functional pull-out rails. By pulling out, lifting and attaching, the table extends by 50 cm on each side. Only a small amount of force is required. Thus, the table can be extended from 160 cm to 260 cm or from 220 cm to 320 cm. The width is 95 cm in each case.</p> <p>An alternative with rough charm is a table frame made of 2 rectangular concrete columns.</p>
