## Assembly instructions for front extension table – Article 1314-, 1316-, 1317-, 1414-, 1416-, 1417-XX

We are delighted that you have chosen our front extension table. With this table you have purchased a high quality product.

Due to packaging-related reasons and to ensure the product reaches you secure and error-free the table is delivered disassembled.

Each step is clearly and very well explained. With a few hand's turns, the table can be set up easily and without previous knowledge.

**Please use a soft base (e.g. the cardboard packing) to assemble the table frame in order not to damage it.**

**The drawings can be found on page 2.**

### **Scope of delivery:**

- Tabletop
- Inlay board(s)
- Table frame
- Table legs incl. assembly kit – consisting of:
  - Assembly instructions
  - Instructions for care
  - 16 x Countersunk screw M8x18
  - 1 x Allen wrench SW 5

### **Caution:**

Please note that **all screws should be inserted** and slightly tightened before tightening all screws firmly!

### **Step 1 – Preposition the table frame:**

Set the table frame aside with the bottom side facing up – note stickers!

### **Step 2 – Prepare table legs:**

Assign table legs with the pre-assembled adapter parts as shown (A, B, C, D) to the frame ends [see Drawing 1].

### **Step 3 – Assemble table legs:**

Insert table leg with adapter into frame end and assemble with countersunk screw M8x18 (2x on top + 2x at the bottom) using the enclosed Allen wrench and tighten firmly [see Drawing 2]. Repeat this with all 4 table legs and subsequently place table frame on table legs.

### **Step 4 – Apply tabletop:**

Position tabletop in centre on the locking device (release with rubber-puffer) glued to the bottom side and place on pull-out rails [see Drawing 3]

**Please note:** Position the tabletop on table frame so that the fitting strip on the bottom side of the tabletop is on the extendable part of the table frame [see Drawing 4]

### **Step 5 – Extend table:**

Lift table frame slightly at the extendable part with both hands and pull apart [see Drawing 5]

### **Step 6 – Apply inlay board:**

Apply inlay board in the same manner as the tabletop (watch position of the fitting strip) and push the table frame back together by also lifting it slightly [see Drawing 6]

**or**

### **Step 7 – Store inlay board:**

Place inlay board crosswise on the two braces between the pull-out rails in extended state and push table frame back together as described above [see Drawing 7].

**Check screws regularly for tightness and retighten if necessary.**
