Assembly instructions for Taku bistro tables – item 1675-XXQ80

We are delighted that you have chosen furniture from the Taku Collection. With this table you have acquired a high quality product.

For packaging reasons, in order that the product reaches you safely and free of defects, the table is delivered disassembled.

We have described each individual assembly step clearly and in detail. Just a few actions are required to assemble the table with ease and without specialist knowledge.

Please place the tabletop on a soft surface when fitting (e.g. on the shipping box), in order to ensure that this is not damaged.

The drawings can be found on page 2.

Scope of supply:

(1)		Tabletop	1x
(2)		Table frame	1x
(3)	[Drawing 1]	Folding adapter	1x
(A)		Allen key	1x

(B)		Allen screw	1x
(C)		Flat washer	1x
(D)		Spring washer	1x
(E)		Phillips head screw	12x

Caution:

Please note that **all screws should only be set in place initially**. Only once all screws have been screwed lightly into position should all screws be tightened!

Step 1 – Check folding adapter:

Ensure that the red rotation guard is correctly attached to the folding adapter (3). [**Drawing 1**]

Step 2 – Align the folding adapter with the tabletop:

Lay the tabletop (1) down on a soft surface (e.g. on the shipping box) so that the underside faces upwards. Now take the folding adapter (3) in the hand and position this on the tabletop (1) so that the red lever points in the direction of the Fischer Möbel logo. [**Drawing 2**]

Step 3 – Attach the folding adapter to the tabletop:

Once you have correctly aligned the folding adapter (3), you can attach the adapter (3) with the aid of a Phillips head screwdriver and the 12 Phillips head screws (E). When doing so you should first screw **all** of the screws lightly in place and then evenly tighten these firmly but **carefully** by hand.

[**Drawing 2**]

Step 4 – Prepare the folding device:

Once the folding adapter (3) has been mounted on the tabletop (1), the folding device can be prepared for attachment to the table frame (2). In order to do so unfold the folding device and latch it. In order to do so actuate the red lever and unfold the folding device. Now take the Allen screw (B) and first place the spring washer (D) and then the flat washer (C) onto the Allen screw (B). Then insert this into the centre hole of the folding device. [**Drawing 3**]

Step 5 – Attach the tabletop to the table frame:

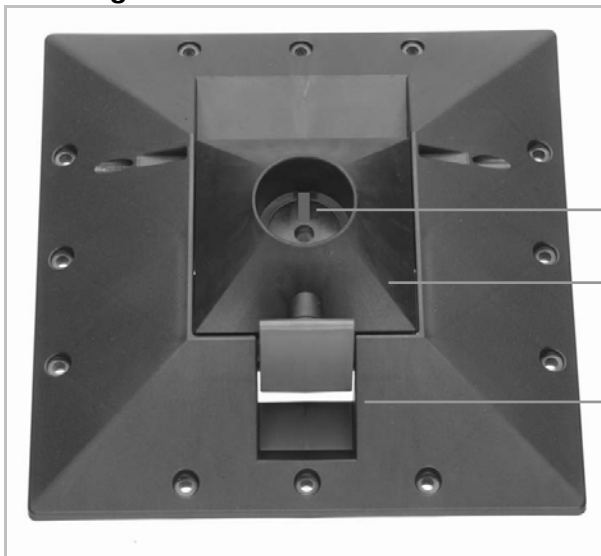

The following steps should always be carried out by 2 people.

Position the table frame (2) alongside the tabletop (1). Guide the tabletop with the open folding device and the Allen screw (B) to the threaded hole in the table frame. When doing so it is essential to ensure that the red key [**Drawing 1**] is placed on the recess in the table frame as a rotation guard. Once this is guaranteed, take the Allen key (A) and tighten the Allen screw (B) firmly.

To **unlock** the tabletop lift up the red lever.

Check the screws from time to time and tighten if necessary.
