

Product information - Cushions

Cushions with fabrics from the Sunbrella Collection

Beyond our standard overlays with fabrics from the Select Collection, we also offer custom overlays made to order. These cushions are sewn from Sunbrella fabrics by our regional partner. The cushions are filled with high-quality furniture foam and a fleece cover. Most of these cushions have an additional zip. Therefore, the instructions described in the upper paragraph as well as the care instructions on the next page apply. The cushions are sewn individually to order in Germany.

Cushions with fabrics from the Select Collection

For the standard armchair cushions and the Cosmo Lounge, we use high-quality outdoor fabric from the Select Collection as a cover. The fabrics are made of high-quality fibres (100% olefin, 316g/m²). They are lightfast and easy to care for outdoors. Various designs are available. Inside the cushions we use QuickDryFoam (QDF), a new type of foam specially developed for outdoor use. This foam has an open-pored cell structure. The decisive advantage is that water can escape unhindered from the foam. It does not accumulate in the foam. Thanks to an antibacterial finish, mould cannot form either. The cushions are dry again after a very short time.

Like all high-quality materials, textile cushions should be cleaned regularly. The cleaning intervals depend on the degree of soiling of the environment and the personal feeling.

When not in use for a longer period of time or even after heavy rain, all parts should be put up so that the parts resting on the frame can dry.

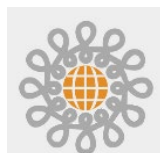

Once the summer is over, we recommend storing the cushions in a sheltered place. If you use protective covers, check them often to see if they are wet or if condensation forms.

A long stay of the furniture outdoors without protection causes soiling due to normal environmental influences, especially on light-coloured textiles. The dirt can be removed with soapy water or a special textile cleaner. You will find more cleaning tips on the next page.

Care of Sunbrella and Select fabrics

- Brush dry
important to remove dust deposits (in case of pollen or pollen in spring).
- Hand wash:
Be sure to observe the quantity instructions for the product used! Afterwards, brush vigorously and rinse in clear water, then leave to dry outdoors.
- Machine wash:
Recommended at a maximum temperature of 40 °C, without pre-wash and without spin cycle (gentle cycle/fine wash). Please allow to dry in the open air. Please re-impregnate with suitable outdoor impregnation after washing.

Cleaning tips

Beer	White vinegar
Fruits/Berries (red)	Water + ammonia (max. 3-6% solution)
Coffee	White vinegar
Cola	Water + soap
Chocolate	treat with lemon juice / detergent (rub)
Chewing gum	Solvent containing acetone
Butter, cooking fat	Solvent containing acetone
Engine oil/grease	If necessary, soften and dilute with oil, then wash out with solvent containing acetone.
Pencil, charcoal	Vacuum, then use cleaning agent
Ink, coloured pencils	Soak in milk for several hours and rinse with cold water or concentrated alcohol (90%).
Lipstick	Trichloroethylene or hydrogen peroxide (20 %)
Mould	Bleaching lye (max. 10%) + soap
Shoe polish	Solvent containing acetone
Grass	Dab with cotton wool soaked in methylated spirit, then rinse with clean water.
Rust	stretch the dirty part over a saucepan of boiling water, sprinkling with citric acid, then rinse with clean water.
Blood	stretch over a saucepan and rinse with water containing ammonia (3 to 6% max.)
Sweat and urine	White vinegar or slightly ammoniacal water
Vomit	Washing-up liquid or white vinegar
Candle wax	Dampen a towel with cleaner containing acetone, cover the fabric with it, then iron over it with an iron.
Wine	White vinegar or slightly ammoniacal water
