

## Product information - Wing light hanging chair

The Wing light hanging chair consists of a combination of high-quality powder-coated aluminium and weatherproof fm-rope. All fittings of the suspension are made of stainless steel and have very high load values. The ropes are variably adjustable in length. When ordering, please state the mounting height. We offer two elegant types for loose suspensions, as well as a hanging frame made of stainless steel.

Safe use as well as proper handling and care of the materials will significantly extend the life and thus your enjoyment of your new piece of furniture for many years.

### We therefore ask you to observe the following instructions:

- The Wing light hanging chair is suitable for hanging at various points, whether indoors or outdoors. Please contact your dealer or us for an individual solution.
- The maximum load weight of 150kg must not be exceeded to prevent damage to your chair.
- The seat shell is suitable for use by one person.
- The Wing light hanging chair is not a standard swing. Careful handling of the chair is required.
- Please check the carabiners and connections at regular intervals for safety.
- We recommend that you check the outdoor ropes regularly and replace them if necessary, after more than five years of use.
- As with any piece of furniture, the high-quality materials of the Wing light hanging chair also require care. Please follow the care instructions in the chapter fm-rope or the summary on page 31.
